Education

Cal State San Bernardino – B.S. in Information Technology, Concentration in Cyber Security May 2026

- CSUSB GPA: 3.5 | Dean's List

Coastline Community College – Associates of Science in Cyber Security May 2024

Skills

Operating Systems: Windows Server 2019, Windows 10/11, MacOS, & Linux (Debian, RHEL, Kali)

Networking & IT Tools: Wireshark, VMWare Workstation Pro, IIS, configured DNS, DHCP, and NAT in lab environments

Tools and Platforms: Microsoft 365 (Lab Environment), Proxmox, Active Directory, Hyper-V, and OPNsense

Hardware: PC assembly, component replacement, system diagnostics, and hardware/software issue resolution.

Projects

Website Deployment Group Project Jan 2026 - May 2026

- Designed and deployed a segmented enterprise network in Proxmox, simulating a secure e-commerce environment
- Implemented WAN, LAN, and DMZ segmentation using OPNsense firewall rules to isolate critical services
- Integrated Active Directory for centralized authentication and user management
- Hardened network infrastructure by refining firewall policies, reducing exposed attack surface in simulated penetration tests
- Role: Configured the email database on Windows Server and MySQL Database on RedHat RHEL Database

VMWare Workstation Virus Analysis June 2025 - July 2025

- Conducted malware analysis in an isolated VMWare sandbox to safely examine ransomware behavior
- Identified Indicators of Compromise (IOCs) through registry and system state comparison
- Analyzed encryption behavior and infection vectors to understand attack methodology
- Documented findings in a structured report, highlighting detection and mitigation strategies

Extracurricular Activities

CrowdStrike Mentorship Sep 2022 - Dec 2022

- Engaged in a structured mentorship initiative through the National Cyber League, focused on exploring cybersecurity careers through guided interviews with CrowdStrike professionals.
- Conducted in-depth interviews with multiple mentors across domains such as threat intelligence, incident response, and cloud security to gain insight into real-world practices and career paths.
- Developed professional communication skills and expanded industry knowledge by asking targeted questions and synthesizing key takeaways from mentor sessions.
- Gained exposure to current challenges and trends in the cybersecurity industry, helping shape academic and career interests in the field.

Previous Work Experience

OCC Bookstore Sep 2022 - Nov 2022

- Provided customer-facing technical support in a high-volume retail environment, troubleshooting transaction and system issues, managing inventory databases, and ensuring accurate data entry while maintaining efficient point-of-sale operations.

Macy's (Seasonal) Nov 2020 - March 2021

- Supported customers in a fast-paced retail environment by resolving transaction issues, operating POS systems, and maintaining accurate data entry.
